

CONTENTS

Simon Friedrich Kraus and Frederik Dilling , Four perspectives on two fundamental concepts - Mathematics and physics teachers' perceptions of models and modeling in the classrooms	3
Tin Lam Toh , Three phases of technology in Singapore mathematics education	17
Thomas Jahnke , Landmarks and orientations in teaching and learning school mathematics	34
Tran Trung, Dao Thai Lai, Trinh Thanh Hai and Nguyen Ngoc Giang , Harnessing smart e-learning materials in mathematical education in general schools	43
Nguyen Le Hoai Thong and Hoa Anh Tuong , Using GeoGebra in teaching cones to develop the competency of using mathematical aids and tools for grade 9 students	60
Chu Cam Tho, Nguyen Thi Quynh Anh, Vu Truong An, Luu Thanh Ha, Duong Thi Thu Huong, Dang Xuan Cuong and Nguyen Viet Dung , Adaptation of 6th-grade students to mathematics assessment standards	72
Truong Huu Hung and Le Thuy Dieu , Designing real-world statistics problems on central tendency of ungrouped data using ChatGPT 3.5	83
Vuong Vinh Phat , Teaching process of a right prism in grade 7 to develop mathematical communication competence for students	99
Nguyen Phuong Chi and Vu Thi Hoach , Organizing activities for primary students to effectively learn mathematical vocabulary	109
Phung Minh Duc, Pham Sy Nam, Le Hong Thai and Tran Van Trung , The GeoGebra software as a tool to facilitate the construction of knowledge about the center of symmetry of a shape at the 6th-grade	122
Chu Minh Chau, Vương Thị Quỳnh, Tran Le Thuy and Nguyen Hoang Vu , Using GeoGebra for teaching problems on fixed points of families of lines and circles in Secondary school geometry	130
Thi Thai Nhat Duy and Bui Anh Tuan , Application of Python for designing visual aids and integration of Artificial intelligence (AI) to teaching mathematics at high schools	137
Nguyen Thanh Cong , The role of metacognition in mathematical modeling process	149

Tran Minh Man and Le Thai Bao Thien Trung , Current situation of cooperative learning in teaching statistics at secondary schools	157
Tran Thanh Binh, Bui Thi Thom and Dang Tung Long , Applying technology to online mathematics education in the digital era	168
Hoang Thi Nga and Pham Thi Anh Hong , Teaching integrated topics to develop the ability to apply knowledge and skills for early primary school students	179
Nguyen Ngoc Giang, Pham Huyen Trang, Nguyen Thi Nga, Ho Loc Thuan and Mai Vu Linh Dan , Integrating mathematics and economics with the support of GeoGebra software in teaching the system of first-order inequalities with two unknowns at the high school level	191
