

CONTENTS

Phan Thi Thuy , Regularity of ideals associated with a complete graph in two weights (2, 1)	3
Nguyen Xuan Thao and Le Xuan Huy , Fourier cosine-Laplace generalized convolution inequalities and applications	9
Ha Huong Giang , Algebraic dependences of meromorphic mappings sharing moving hyperplanes without counting multiplicities	23
Vu Dinh Hoa , Finding the shortest path in an extended weighted graph	32
Le Viet Hoa, Cao Luong Van Huong and Chu Thi Chung , A quantum phase transition in Bose-Einstein condensates	40
Le Viet Hoa, Nguyen Tuan Anh and Pham Van Dien , Phase transition in the $Z_2 \times Z_2$ model based on CJT formalism	48
Nguyen Quang Hoc and Dinh Quang Vinh , Study on the melting of substitutional alloy AB with interstitial atom C and FCC structure under pressure	59
Nguyen Quang Hoc and Dinh Quang Vinh , Thermodynamic properties of binary interstitial alloy with FCC structure: dependence on temperature and concentration of interstitial atoms	72
Pham Van Vinh and Tran Xuan Bao , Synthesis of Cu/Cu ₂ O nanoparticles by bipolar electrolysis method for electrocatalyst in ethanol oxidation reaction	82
Bui Thi Ha Giang and Dao Thi Le Thuy , Production of Higgs in two photon collision	89
Vu Thi Thanh Ha, Vu Van Hung and Vu Hong Nhat , Investigation of thermodynamic and mechanical properties of AlyGa1-yAs/GaAs systems by statistical moment method	96
Duong Thi Ha, Dinh Thi Thuy and Nguyen Ai Viet , A simple unity theory for three types of polaritons (phonon polariton, exciton polariton and plasmon polariton) expanded model for surface polaritons	104
Duong Dai Phuong and Nguyen Thi Hoa , Investigation Young's modulus of metallic thin films by statistical moment method	111
Tran Thuy Duong and Truong Minh Anh , Study on melting of uranium dioxide	122
Duong Quoc Van, Le Minh Thu and Nguyen Minh Thuy , V-doped TiO ₂ anatase: calculation and experiment	127

Nguyen Thi Thuy, Nguyen Thi Huyen Trang and Ngo Ngoc Hoa, Determination of carbon dioxide concentration in the atmosphere from absorption spectra	135
Nguyen Thi Thanh Ha, Mai Thi Lan and Pham Khac Hung, The dynamic heterogeneity of aluminum-silicate under compression	142
Nguyen Thi Thao and Le Van Vinh, Molecular dynamic simulation of the crystallization of liquid iron nanoparticles	148
Tran Manh Cuong, Defect in the structure generates multi-band perfect metamaterial absorber in THz regime	156
Nguyen Cao Khang, Preparation and characterization of TiO ₂ /GaN nanostructure composite for a degradation reaction of methylene blue	162
Nguyen Thi Thu Ha and Mai Thi Lan, The short and intermediate range orders in a model of amorphous silica under compression	170
Dinh Thi Thuy, Nguyen Ai Viet, Duong Thi Ha, Nguyen Thi Hanh and Le Xuan Hung, Studying the physical-medical-biological properties of heme group in red blood cells	176
