|                                                                                                                                                                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Bach Viet Hoang</b> , Spectral radius conditions for connected planar graphs to have a few cut-edges                                                                                                                                                              | 3   |
| <b>Nguyen Viet Dung and Nguyen Thi Kim Oanh</b> , Semi-implicit Milstein scheme for stochastic Ginzburg-Landau equations                                                                                                                                             | 9   |
| <b>Luu Ba Thang</b> , Greatest common divisor of shifted Pell numbers and balancing numbers                                                                                                                                                                          | 20  |
| <b>Nguyen Nguyen Nam and Pham Dinh Phong</b> , Fine-tuning domain-specific pretrained transformers for automated short answer grading and feedback generation                                                                                                        | 27  |
| <b>Nguyen Huu Bao, Le Xuan Hien* and Pham Tho Hoan</b> , SQL judge: design and implementation of an automated SQL query grading platform for high school informatics education                                                                                       | 39  |
| <b>Nguyen Viet Hung</b> , Study of the existence and stability of spatial soliton beams in higher-order nonlinear optical fibers with gain and loss                                                                                                                  | 51  |
| <b>Dao Thi Le Thuy and Le Nhu Thuc</b> , Production of vector unparticle pairs in $e^+e^-$ collisions                                                                                                                                                                | 64  |
| <b>Pham Thi Lien, Nguyen Thi Thao and Tran Duc Hiep</b> , Composition and temperature effects on short and medium-range order in lithium silicate glasses: a molecular dynamics study                                                                                | 77  |
| <b>Tran Thi Thoa, Nguyen Phuong Linh, Nguyen Thi Khanh Linh, Vu Thi Huong Giang and Hoang Van Hung</b> , Effects of vacancy defects on monolayer hbn: a density functional theory study                                                                              | 88  |
| <b>Nguyen Xuan Thanh, Nguyen Thanh Thuy, Chu Duc Ha, Dong Huy Gioi and Tran Thi Thanh Huyen</b> , Comparative analysis of physiological and biochemical characteristics of <i>Plectranthus amboinicus</i> grown in hydroponic and aeroponic systems                  | 98  |
| <b>Tran Thi Thuy Van, Mai Thanh Tan, Vu Anh Tai, Le Van Hoat, Nguyen Thanh Binh, Ngo Thi Bich Hong, Tong Phuc Tuan and Vu Khanh Linh</b> , Assessment of forest changes in Nghe An province for risk determination under the European Union Deforestation Regulation | 108 |
| <b>Vu Thuc Hien, Le Hanh Chi, Nguyen Thanh Chung, Luu The Anh, Dao Ngoc Hung and Vo Thanh Son</b> , A set of management effectiveness indicators for biosphere reserves in Vietnam: a case study of the Western Nghe An Biosphere Reserve                            | 119 |
